Shaping the Future of Work

how to walk again, only to suffer a devastating fall, nearly caused him to ditch his trademark optimism and “get out of the lemonade business altogether.” Does he make it all of the way back? Read the book.

events in the past decade presented additional challenges. In No Time Like the Future: An Optimist Considers Mortality, Michael shares personal stories and observations about illness and health, aging, the strength of family and friends, and

too often obscures more than it reveals. 22 Ideas to Fix the World is living history in the finest sense—a lasting chronicle of the state of the global community today. Interviews with: Zygmunt Bauman, Shimshon Bichler & Jonathan Nitzan, Craig

These inspiring exchanges from some of our most sophisticated thinkers on world policy are honest, brief, and easily understood, presenting thought-provoking ideas in a clear and accessible manner that cuts through the academic jargon that

topics like the Arab Spring, the influence of international financial organizations, the possibilities for the growth of democracy, the acceleration of global warming, and how to develop enforceable standards for market and social regulation.

and the Middle East. Speaking from a variety of perspectives, including economic, social, developmental, and political, the discussions here increase our understanding of what’s wrong with the world and how to get it right. Interviews illuminate megatrends that are reshaping the global political economy and provide a fresh and dynamic understanding of global social and political events.

If you enjoy these conversations, you will want to follow that conversation, rather than the attempts to solve problems. The themes of this book are much broader than any one conversation. The book is a conversation about what’s right with the world and how to get it right. In his new book, How to Fix the Future, Keen considers what we can do to shape the future of our workability, and to make the future a worthy place for human beings to live and to work.

future, he has been at the cutting edge of the debates over the digital economy. His 2007 book, The Cult of the Amateur, was critical in helping to advance the conversation around the Internet, which has now morphed from a tool providing efficiencies and opportunities for consumers and business to a force that is profoundly reshaping our societies and our world. In his new book, How to Fix the Future, Keen considers what we can do to shape the future of our workability, and to make the future a worthy place for human beings to live and to work.

How to Fix the Future: Staying Human in the Digital Age

Andrew Keen 2018-03-01 Internet entrepreneur Andrew Keen was among the earliest to write about the dangers that the Internet poses to our culture and society. His 2007 book The Cult of the Amateur was critical in helping to advance the conversation around the Internet, which has now morphed from a tool providing efficiencies and opportunities for consumers and business to a force that is profoundly reshaping our societies and our world. In his new book, How to Fix the Future, Keen considers what we can do to shape the future of our workability, and to make the future a worthy place for human beings to live and to work.

The Math(s) Fix
THE MINISTRY FOR THE FUTURE ranks among Robinson’s best recent works, a collection of actions and observations that adds up to more than the sum of its eclectic and urgent parts. It is a rich and provocative meditation on our time, grounded in the author’s deep understanding of how the world has changed since she first wrote of it nearly two decades ago. Few works so clearly capture the scale of our moment, the complexity of its challenges, and the urgency of its need for radical transformation. It is a book whose themes of global warming, the rise of surveillance capitalism, and the need for new forms of collective action are more relevant today than ever. The Ministry for the Future is a timely call to action—a call for a new way of thinking about the world’s future—and a powerful reminder of the power of collective action to shape that future.

The Future of Work: Writing the Past, Inscribing the Future

Writing the Past, Inscribing the Future starts with a question: how can we use a world-renowned intellectual history in order to generate, with it, an opening for the future? This book is born in the age of surveillance capitalism and explores how the way we think about the past is changing in the face of new forms of surveillance and control. It examines how the past is written, read, and used, and how it is inscribed in the present. The book argues that the future is not just about the potential for radical change, but also about the need for a new way of thinking about the past. It explores how the past is used to create narratives of the future, and how these narratives can be used to inspire and mobilize action. The book concludes with a call to action: how can we use the past to create a more just and sustainable future for all?

A Big House Later: If civilisations are to succeed, this century will have to be a time of dramatic transformation, not just in technological capacity but also in its approach to the natural world—and each other. The need for a sustainable world is urgent, but the path to it is complex and requires action at multiple levels. This book examines the challenges and opportunities of this transformation, and offers a framework for how we can work together to create a more sustainable future.

The Ministry for the Future: How the Next 20 Years Will Affect Everything You Think Will Happen Next

In The Ministry for the Future, Jeanette Winterson offers a bleak and brutal vision of what lies ahead for humanity. The book is a warning about the dangers of climate change, surveillance capitalism, and the erosion of democratic values. It is a call to action for all of us to work together to create a better future. The book is a powerful reminder of the importance of collective action and the need for a new way of thinking about the world. It is a book that challenges us to be more aware of the impact of our actions and to take responsibility for the future we create. The Ministry for the Future is a book that is essential reading for anyone who cares about the future of our planet and our society.

Culture Fix

Culture Fix offers a blueprint for building great cultures in organisations. It is a comprehensive playbook for creating a world-class organisation that is driven by purpose, values, and a sense of mission. It is a book that is essential reading for leaders and managers who want to create organisations that are not just profitable but also significant and meaningful.
